

# Paint brush

## Chip paint brush

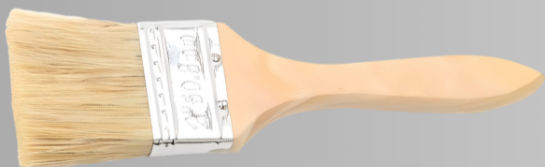

The bristles are made of nylon and polyester fibers, the handle is made of wood, and the metal ring that fixes the bristles to the handle is made of metal.

It can be used with a variety of paints (oil-based, water-based) and adapt to different surfaces (walls, wood, metal).

The price is economical and suitable for one-time painting, home DIY or short-term projects.

## hog bristle Paint brush

- Natural pig hair Wooden handle
- Bristle paint brushes can also be seen in some high-temperature scenarios, such as when applying oil during barbecue. Generally, the temperature during barbecue is around 100°C -200°C, so bristle paint brushes can be used normally and will not be easily burned.

## Paint brush (Rosewood handle)

- Thickened and dense bristles Wooden handle
- It can be used for painting wood, walls, doors and windows in home decoration, and is also suitable for painting metal products, mechanical equipment, etc. in the industrial field.
- Good brushing effect, the bristles are thicker, denser and closely arranged, which can evenly dip and release paint.

0408	8"	238mm/8.77"	200mm/8"	34mm/1.33"

# Water-based paint brush

- The mainstream choice of bristle material is synthetic fiber (nylon/polyester), which is highly water-resistant, not easy to deform, and suitable for the quick drying characteristics of water-based paint.

coding	size	length	width	Bristle length
0502	2"	190mm/7.48"	50mm/2"	35mm/1.37"

<b>0505</b>	5"	230mm/9.05"	125mm/5"	43mm/1.69"

# Roller brush

## Yellow blue strip (Roller brush)

**Color identification:** The distinctive appearance feature is alternating yellow and blue stripes. The color contrast is obvious and easy to identify. It is not only decorative, but also convenient for users to observe the status of the roller brush during use.

The bristles of chemical fiber material have good elasticity and wear resistance, can evenly dip and apply paint, and the price is relatively affordable;

coding	size	length	width	Pipe diameter
1004	4"	240mm/9.44"	100mm/3.93"	60mm/2.36"
1006	6"	230mm/9.05"	130mm/5.11"	60mm/2.36"
1009	9"	285mm/11.2"	215mm/8.46"	60mm/2.36"

## No blind spots (Roller brush)

The bristles of a no-dead-angle roller brush are usually denser and evenly distributed, so they can fit closely to the corners and penetrate deep into the corners for efficient painting.

coding	size	length	width	Pipe diameter
1104	4"	260mm/10.2"	100mm/3.93"	65mm/2.55"
1106	6"	260mm/10.2"	135mm/5.31"	65mm/2.55"
1108	8"	290mm/11.4"	200mm/7.87"	65mm/2.55"
1109	9"	300mm/11.8"	225mm/8.85"	65mm/2.55"

## 4 inch small corner (Roller brush)

It is small in size, easy and flexible to operate, and can easily reach dead corners and gaps that are difficult to reach with ordinary roller brushes, such as furniture corners, wall corners, around doors and windows, etc., making the painting work more detailed.

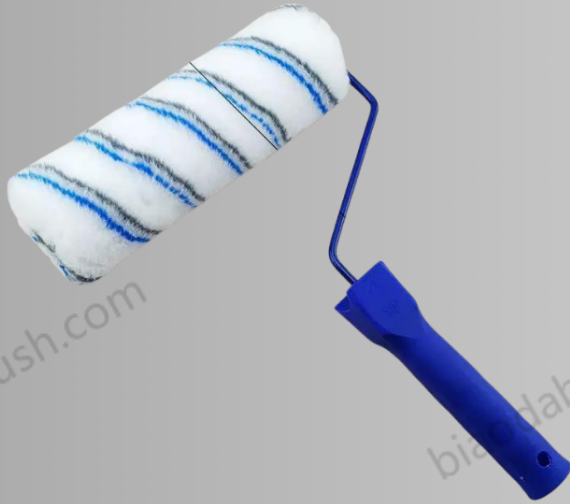

coding	size	length	width	Pipe diameter
1204	4"	300mm/11.8"	100mm/3.93"	45mm/1.77"

## color strip(Roller brush)

Color identification: The color stripes are the prominent appearance features, with obvious color contrast and easy to identify. Not only does it have a certain decorative effect, but it also allows users to observe the status of the roller brush during use.

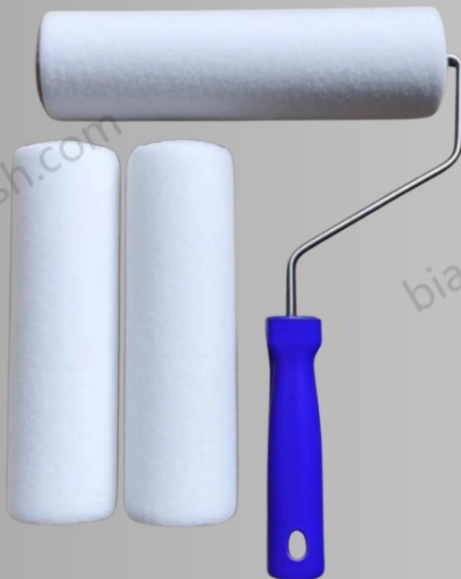

coding	size	length	width	Pipe diameter
1309	9"	300mm/11.8"	220mm/8.66"	66mm/2.59"

## blue Ash strip (Roller brush)

Color identification: The distinctive appearance feature is the alternating blue and gray stripes. The color contrast is obvious and easy to identify. It is not only decorative but also convenient for users to observe the status of the roller brush during use.

coding	size	length	width	Pipe diameter
1409	9"	340mm/13.3"	230mm/9.05"	80mm/3.14"

## Fine hair (Roller brush)

A fine-hair roller, also known as a fine-hair roller or a short-hair roller, is a common paint tool. It can be used with various types of paints such as latex paint, oil paint, and coatings. It can be applied on walls, ceilings, furniture surfaces and other surfaces. The rolled paint film feels delicate, the surface is smooth and uniform, the texture is fine or even no obvious texture. It is especially suitable for occasions that require high painting effects and pursue smooth paint surfaces.

coding	size	length	width	Pipe diameter
1509	9"	330mm/13.0"	220mm/8.66"	65mm/2.55"
